

Master your digital media with Autodesk Cleaner 6.5, the essential video encoder.

Flexibility

With over 60 supported media formats, Autodesk® Cleaner® 6.5 software, specifically designed for the Apple® Macintosh® platform, can now encode to more output formats than any other product on the market, giving you the flexibility to deliver results in the formats you need including Apple QuickTime® software 7, Macromedia® Flash® video (FLV and SWF), MPEG-4, MPEG-2, and even Kinoma® for handheld devices such as Palm®, Handspring®, Sony® CLIE®, and Kyocera® mobile devices.

Quality

Cleaner produces the highest quality output. With Cleaner software, you will find that many of our filters now process in native YUV to help maintain source fidelity. We include features for high quality output in the most important playback environments such as the Internet and DVD.

Productivity

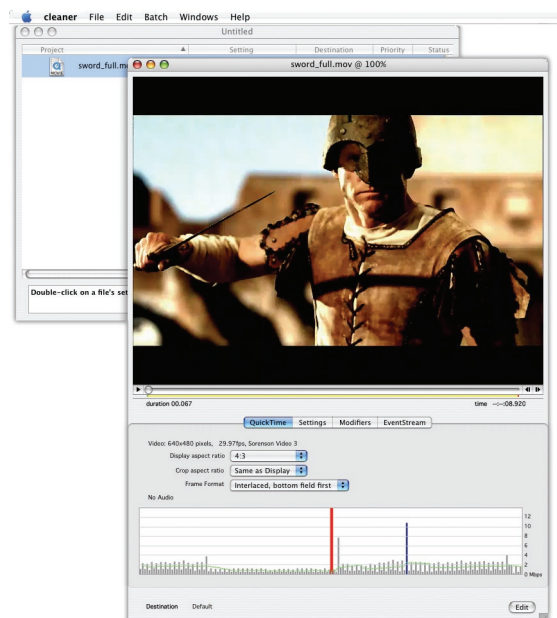

Cleaner helps realize ideas faster. Using advanced features, including efficient drag-and-drop encoding, it's easy to compress files directly from your editing station. Add stream navigation, synchronize HTML to streaming media, and embed links and interactive hot spots to truly engage your audience.

Supported Input Formats

DV, QuickTime (with MPEG-4 and AAC support), Video for Windows® (AVI), MPEG-1, MPEG-2, MPEG-4, MPEG Layer I Audio, MPEG Layer II Audio, AIFF/AIFC, AU, Sound Designer II, WAV, OpenDML, and other video, audio, animation, and still-image formats.

Supported Output Formats

QuickTime (with MPEG-4 and AAC support), RealVideo® & RealAudio®, Windows Media® 7, MPEG-1, MPEG-2, Kinoma, DivX®, FLV, SWF, MP3, DV, MPEG Layer I Audio, MPEG Layer II Audio, Video for Windows (AVI), AIFF/AIFC, WAV and other video, audio, animation, and still-image formats.

Detailed Feature List

Support for the Latest In-Demand Formats

- **NEW** Export to the widely adopted DivX format
- **NEW** Export to Flash video FLV and SWF for playback using the Macromedia Flash Player
- **NEW** Support for QuickTime 7, including H.264
- 3GP and Sony MQV support to encode to common handheld devices
- Support for Microsoft® Windows Media 7, including multi-channel audio
- Support for Real 10, which includes RealVideo and RealAudio
- Kinoma format for Palm OS based PDAs.
- Fast MPEG encoding (including 4:2:2 and two-pass) speeds media preparation for DVD and Video CD creation
- Robust support of the industry's most compelling media formats including: MPEG (1, 2 & 4), MP3, AVI, and WAV

Productivity Features

- Hundreds of professional encoding settings are included
- Drag-and-drop for instant encoding
- A/B setting preview mode
- Dual-processor support
- Automated batch encoding for hundreds of video files
- Dynamic preview slider for in-frame comparison
- Faster processing and quality for native YUV sources
- Faster YUV filtering chain performance
- Custom settings creation and management
- Seamless publishing to video servers
- Author interactive video through simple interface

Monitoring Tools

- View input source with playback and navigation controls
- Specify encoding range using in and out points
- Preview result of video filters before encoding
- Side-by-side adjustable split view to compare before and after filters prior to encoding

Video & Audio Filters

- Adaptive noise reduction for sharper compressed video
- De-interlace through top/bottom field removal and blend filters
- Remove 3:2 pull-down with enhanced telecine filter
- Crop, scale, and enhance video appearance
- Audio sweetening through dynamic range, normalize, and reverb filters
- Audio repair through high pass, low pass, noise gating, noise removal, and notch filters

Minimum System Requirements

- Apple Macintosh computer with PowerPC® G4 or faster processor (recommended: G5 processor)
- Mac OS X 10.3 or 10.4
- QuickTime 6.5 or 7
- 512 MB of RAM (768 MB of RAM or more for HD video)
- Display card supporting 1024 x 768 resolution and 16-bit color (recommended: 24-bit color)
- CD-ROM drive
- 35 MB of available hard drive space for software installation
